Points

AcuPoint Analysis
BRONCHITIS, ACUTE*
(DESCRIPTIONS)

Point	Description
C22	In the center of the depression above the supraorbital notch, the pressure being applied downward alongside the trachea.
G16	1 cun below the area where the skull joins the spine (cervical atlas), on the spine.
GB20	This point is right under and against the base of the skull, in the two small muscular grooves at the back of the neck, two to three inches apart depending on the size of the head.
LI04	On the back of the hand between the thumb and index finger metacarpal bones. Find the spot midway on the bone that connects the index finger to the wrist. Sometimes this point is easy to find by squeezing two fingers together to form a small mound and marking an imaginary point at the peak of that mound. Then probe inward toward the main body of the hand, right on the bone.
LU05	In the hollow, but more toward the outside (direction of the thumb) of the inner elbow crease.
LU08	1 Cun from the upper fold of the wrist at the base of the thumb on the inside of the arm.
P06	The width of two thumbs (2 Cun) above the most prominent crease on the inner wrist, in line with the middle finger.
ST40	8 cun below the knee cap and 1 cun behind the shin bone.
UB12	1.5 Cun from the spine midline, slightly below a line between the tips of the shoulders. Easily stimulated with the Back-eze.
UB13	1.5 Cun from the spine midline, just above the inside end of the bony part of your shoulder blade (spine of scapula). Level with the third thoracic vertebra about 4 cun above the bottom edge of the scapula.
